

Video Calls on Mobile

The **Webex app** on your mobile allows you to start a call in a space or join an incoming call at any time.

To start a video call:

Tap to open your video and audio preview.

Audio and video: green icons mean audio and video is on. Red means you are muted or your video is hidden.

Step 1: Tap the **Meet** button within the space.

Tap to start the call.

Step 2: Tap **Join**.

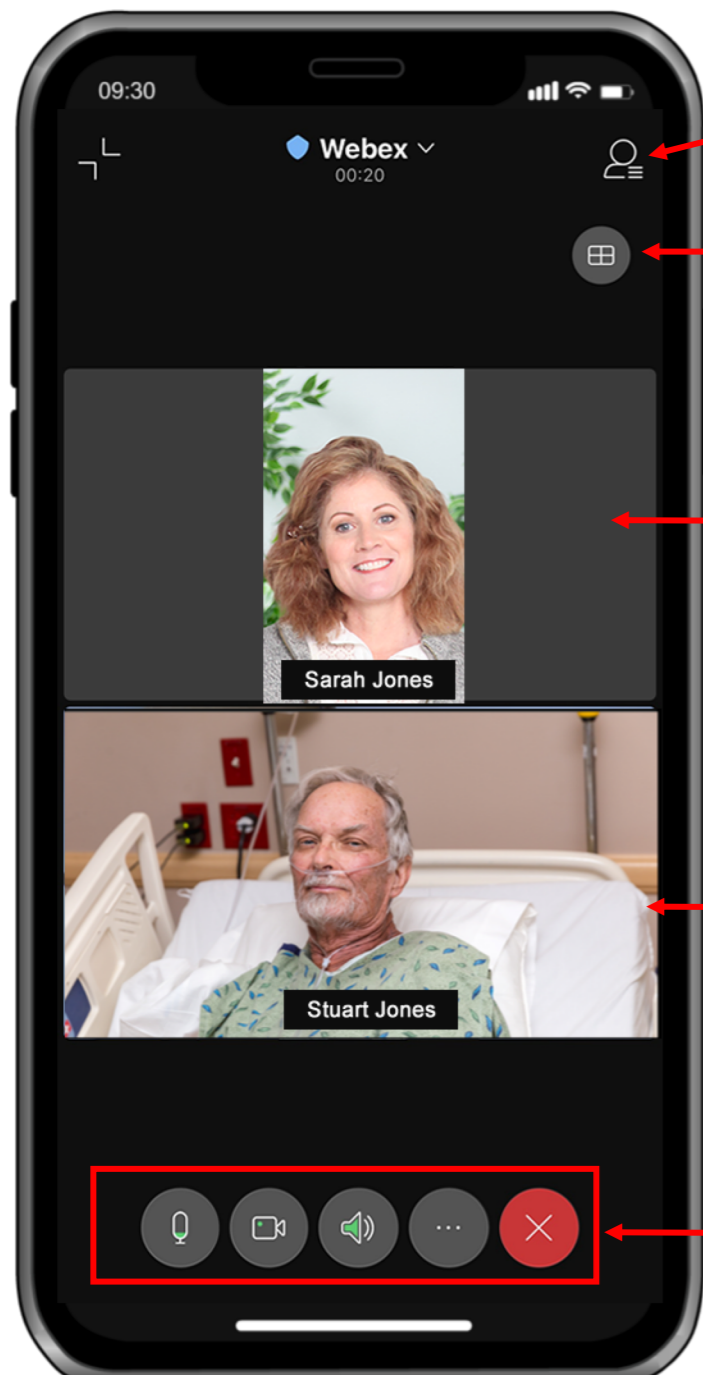

Video Calls on Mobile

The video call will start and all family members will be notified on their Webex app.

Your screen will show **“Waiting for others to join...”** until your family members join.

Tap to show who is on the call.

Tap to show change from Grid view to Focus, to focus on the active speaker.

To switch your camera to room view, tap on your self view to see the option to swap from the front camera to the back camera.

Video display of other family members on the call will display.

Active call options. Tap the screen to show these options.

Mute your microphone.

Grey with green means your microphone is on, red means your microphone is off.

End the call.

Turn your video on or off.

Grey with green means your video is on, red means your video is off.

Switch the call audio from the speakerphone to earpiece.

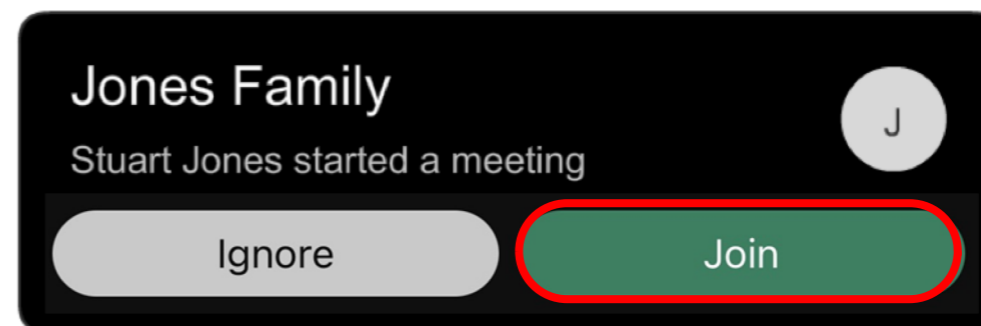

Video Calls on Mobile

If someone else in the space has started the call you will receive a notification on your Webex app.

To join a video call:

- Tap Join on the notification.

Should your loved one be unable to speak we recommend one family member visit in the space at a time to allow one-on-one time.
